MARKETING MATERIAL

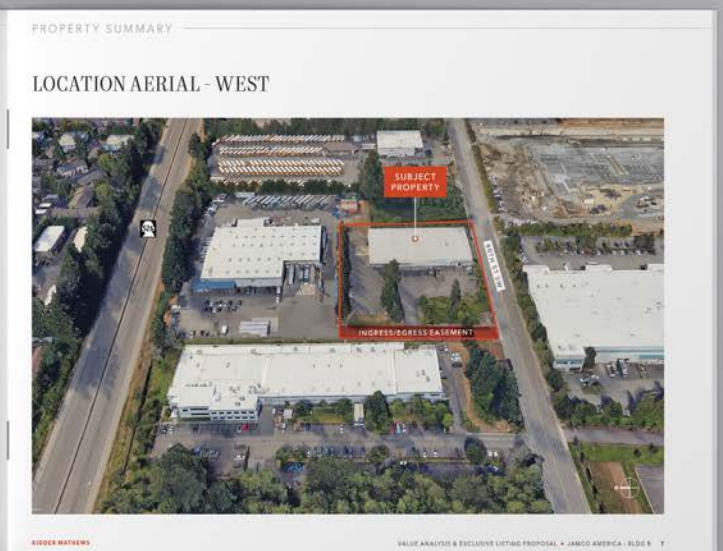

Currently my work is focused in commercial real estate, which includes designing offering memorandums, broker opinion of value/listing pitches, social media posts, eflyer campaigns and flyers.

Nice one- or two-liner callout goes here about the wonderful property

Here would add a couple sentences about the property. 24,000 SF of Class A office space for lease in the city's district, steps away from the world-famous Ferry Building.

LOGO DESIGN

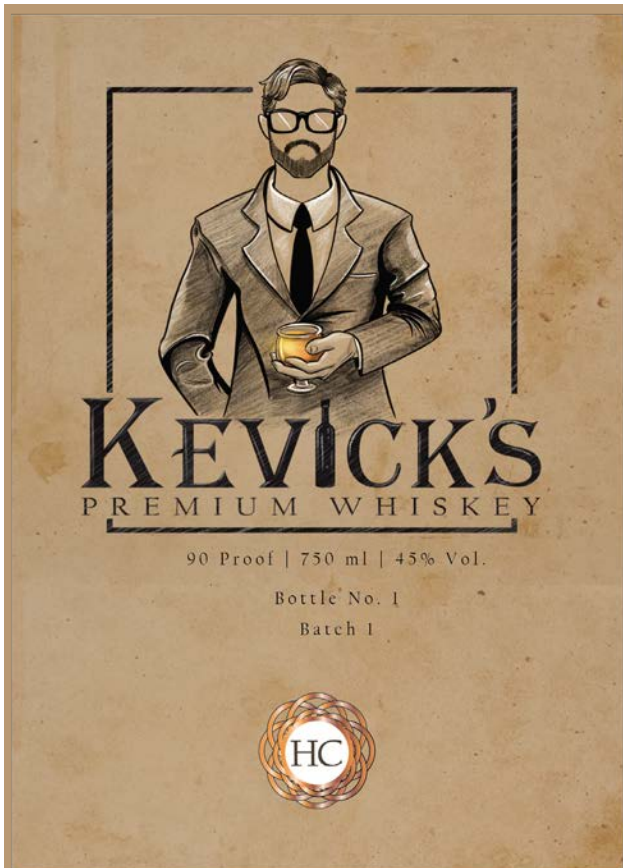

As a freelance designer, I have created logos and branding for small businesses, musicians, real estate agents, property owners, and entrepreneurs. This particular project was for a client who wanted to elevate her hair

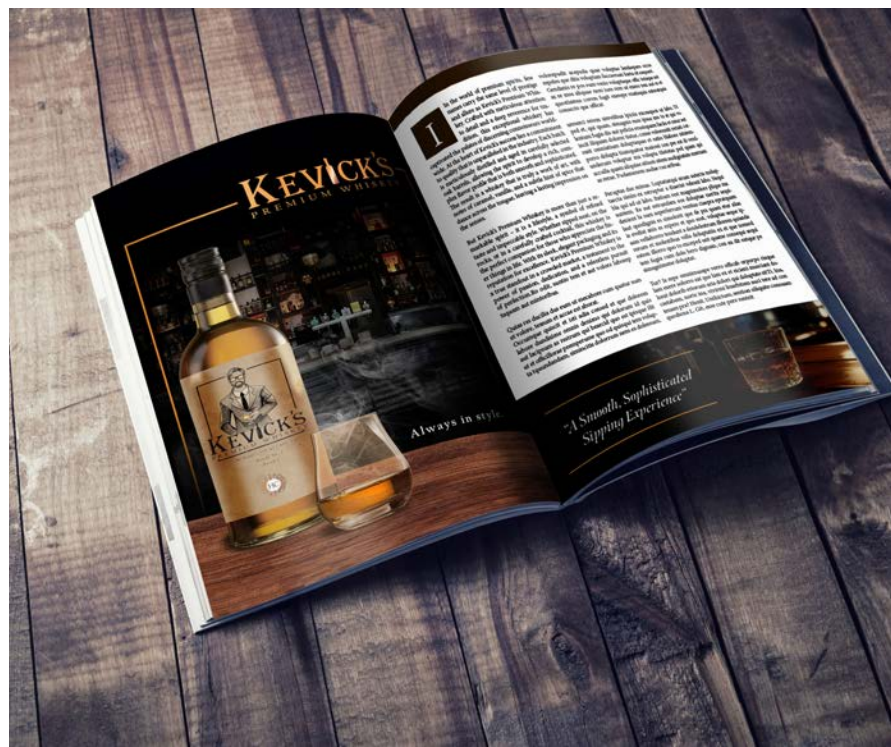

stylist career when she relocated from a small town in Southern California to a more upscale beach city. The concept for her logo and branding was to be fun and elegant.

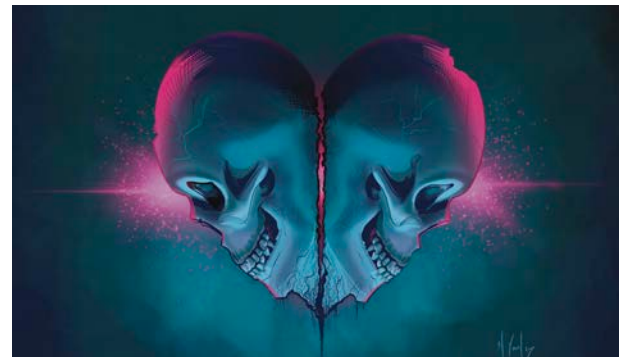

BRANDING PROJECT

As an artist and designer, I am always looking for new challenges to help me better myself and keep my skills sharp. With this project, I created a fictional brand based on a hypothetical business venture with my best friend.

ILLUSTRATION

My true passion has always been art, and because of my love of comic books since a young age, I have always picked up the pencil to draw. That passion and creative drive flourished when I learned to combine my love of drawing with a digital design element.
